

MB Docket No. 04-233

I write to comment on the consideration of prioritizing LPFM over FM translators. Please do not displace current FM translators. I am a listener of 94.7 & 94.9 FM in the Memphis area, as are many others, judging only by the number of their bumper stickers seen daily on our streets. These are stations that serve a particular interest (family values) and are supported by their listeners, which enhances their value to them. To lose this station would leave a void in our area – a void in both content and style. It is important to me that this station and others like it be encouraged to continue providing the positive programming that I believe our society needs.

Thank you for working carefully to make the best decision.

Molly Burr
